Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention: Group I, claims 1-112 and 248-256 directed to a species of electro-active lens wherein the lens is a spectacle lens and a first lens optic has astigmatic correction; Group II, claims 113-127 directed to a species of electro-active lens having a first and a second index of refraction; Group III, claims 128 and 215 directed to a species of electro-active lens having a first lens optic that provides distance correction or multifocal refraction; Group IV, claims 129-146 and 257-258, directed to a species of electro-active lens having a range finder; Group V, claims 147-205 directed to a species of electro-active lens having a first electro-active zone including an electro-active polymer gel; Group VI, claim 206-214 directed to a species of electro-active lens having an electro-active region that encompasses a portion of a first layer in a cooperative relationship with a first lens optic; Group VII, claim 216 directed to a species of electro-active lens having a near-vision electro-active zone located intermittently above a 180 meridian of a first lens optic; Group VIII, claims 217-219 directed to a species of electro-active lens having two electro-active portions separated by an insulating portion; Group IX, claims 220-222 directed to a species of electro-active lens having a plurality of programmably controlled electro-active portions; Group X, claims 223-230 directed to a species of electro-active lens having an electro-active zone adapted to correct astigmatism or aberration; Group XI, claims 231-235 directed to a species of electro-active lens having an electro-active zone in cooperation with a first lens optic to correct a wearer's vision to better than 20/20; Group XII, claims 236-246

Art Unit: 2873

directed to a species of electro-active lens having a tracker to alter a first electro-active zone from a plurality of such zones; Group XIII, claim 247 directed to a species of electro-active lens comprising a semi-finished lens blank.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2873

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jordan M. Schwartz whose telephone number is (703) 308-1286. The examiner can normally be reached on Monday to Friday (8:00-5:30), alternate Fridays off.
